

### Solid Foundations

Free, open source software built upon proven web technologies. Clean HTML without additional code dependencies or script libraries.

# Tag-based Templates

Its easy to learn, surprisingly

powerful and flexible. Structure your website and manipulate its content your way.

### Fast & Secure

The core is lean, reliable and responsive, with plugins to extend functionality.

# Deceptively Simple

With built-in simplicity, from the way Content is separated from Presentation, to a minimal yet expressive UI.

# Just Write

Site layout shouldn't get in the way of content.

## Tiny Footprint

Because small is beautiful, elegant and fast.

# Build only What you Need

websites. Plugins extend this.

The core is powerful enough for most

# Textile, Markdown etc. Use the Textile text formatting

language, or use Markdown via a

HTML).

plugin (or write plain text or vanilla

### With its built-in simplicity, a blogger can start publishing in minutes.

Who is it for?
